

Abstract

A machine tool comprises a tool magazine (48) which comprises an end-less chain (51) that is circulatorily drivable and provided with tool-holding
5 fixtures (56). The tool magazine (48) is angular, having a substantially horizontal top limb (61) and a bottom limb (57) which extends downwards. The chain (51) extends substantially through both limbs (57, 61). A fitting location (59) is provided in the bottom limb (57).
